

ATTACHMENT A

Remarks

Applicants respectfully submit that this amendment to the specification corrects typographical errors which occurred in the preparation of the present application and therefore this Preliminary Amendment does not constitute new matter. Specifically, Applicants recently discovered that a clerical error had occurred at the time of preparing the present application in which Table 3 (page 9) included clerical errors, namely various fields (boxes) of Table 3 included data from Table 2 (page 7). Inadvertently, the header box (column 1, row 1) and column 1, rows 5 and 6 of Table 3 include the identical data from Table 2.

This error was of a clerical nature which is apparent from the text describing Tables 2 and 3. In particular, the description of Test 3 which is summarized in Table 3 and described on page 8 fully supports the correction to Table 3. Moreover, it is readily apparent from the complete specification that the data from Test 1 corresponds with Table 1, Test 2 with Table 2 and Test 3 with Table 3. Therefore, one readily appreciates that Table 3 as filed contained erroneous data. By this Preliminary Amendment, Applicants have corrected this oversight.

Based on the foregoing, Applicants respectfully submit that this Amendment merely corrects a clerical error and therefore, does not contain new matter.

END REMARKS
